House Set To Introduce Corps, EPA, Wetlands Bill Wed., April 21

Below is a press release sent out about the press conference the Oberstar Transportation and Infrastructure Committee will hold this Wednesday, April 21st. You can watch the proceedings on the Internet at 11:00 a.m. at:

<http://transportation.house>

For questions, contact Committee Press Secretary Mary Kerr at 202-225-6260 or mary.kerr@mail.house.gov

You'll find attached an advisory from the House Committee on Transportation and Infrastructure, regarding a news conference to take place at 11:00 a.m. on Wednesday, April 21 to announce the introduction of "America's Commitment to Clean Water Act."

WHO: Rep. Oberstar and representatives from the environmental community, conservation groups and local government.

WHAT: News conference to discuss introduction of "America's Commitment to Clean Water Act."

WHEN: Wednesday, April 21 at 11:00 a.m.

WHERE: Room 2167, Rayburn House Office Building, Washington, D.C.

The press conference also will be webcast live at <http://transportation.house.gov>.

For questions, contact Committee Press Secretary Mary Kerr at 202-225-6260 or mary.kerr@mail.house.gov

House Corps and EPA Wetlands Land Grab To Be Introduced.

New name in House for the Clean Water Restoration Act.

Transportation Committee Chairman James Oberstar (D-MN) will try to move the Corps and EPA Wetlands Land Grab Bill (now known in the House as the "America's Commitment To Clean Water Act" but still the "Clean Water Restoration Act" in the Senate.

Look below to see if your Congressman is on the list of Members of Congress on the House Transportation and Infrastructure Committee who will vote on the "America's Commitment To Clean Water Act".

If you live in the state of one of the Congressman listed below, call, fax and e-mail him or her to oppose the proposed bill. It does not even have a number in the House yet. Oberstar is trying to build support for his bill in secret.

If you live in the same state as one of the Congressmen listed below, you have a tremendous chance to make history. You must take action to let your Congressman know he or she will be held responsible in November for their vote that could give the Corps and EPA jurisdiction over all waters of the United States and all activities affecting those waters.

If your Congressman is not listed on the Committee, you must still call, fax and e-mail him or her to get a commitment to oppose the "America's Commitment To Clean Water Act", what we call the Corps and EPA Wetlands Land Grab Bill.

-----You are doing great. But the battle continues. Your calls, letters, faxes and e-mails have temporarily stalled off the "America's Commitment To Clean Water Act" from passing the in the House Transportation and Infrastructure Committee chaired by Rep. James Oberstar, (D-MN).

Congressman and Chairman Oberstar has no intention of stopping his push to control your water and your land. All your water and your land.

-----This bill is a huge threat. You will save a lot of money defeating the Corps and EPA Wetlands Land Grab Bill now rather than having to spend huge amounts of money on lawyers and the courts to fight the Corps and EPA in the future for years.

-----The Corps and EPA Wetlands Land Grab will damage ranchers, farmers, business owners, landowners, miners, cabinowners, forestry advocates, off highway vehicle users and any users of private or Federal land. It will strangle small cities and communities. It will cost millions of jobs.

*****Notice: Look below for background on this incredible threat and a list of the key Members of the House Transportation and Infrastructure Committee including Fax and e-mail addresses.

There are lots of groups who have joined the fight. The coalition of groups fighting this bill must continue to enlarge. Reach out to your friends, allies and other groups.

By defeating the Oberstar Corps and EPA Wetlands Land Grab Bill you prevent the Corps and EPA from gaining jurisdiction over your property and all Federal lands. The Corps and EPA will be limited to jurisdiction only over waters that are "navigable." That was intended by the 1972 Clean Water Act.

Because this is a big election year, the Democrats are very nervous. Your calls, faxes and e-mails are having a great effect.

Rep. Oberstar is still planning a vote and is hoping to bring along all his Democrat Committee Members. It looks now like he has a good

chance of doing that. However, all the Republicans are still opposed to the bill. But they are outnumbered.

Your calls, faxes and e-mails have made the Democrats concerned in the House Transportation Committee Chaired by Oberstar. But they now seem willing to follow Rep. Oberstar's lead. You must deluge the Committee with calls.

This is the time for backroom deals. A dark of night a deal has likely been struck. Without your continued pressure, your Congressman could sell you out. Your Congressman must hear from you that he or she will be held responsible if the "America's Commitment To Clean Water Act" passes (Remember, it is still called the "Clean Water Restoration Act" in the Senate.)

With the election hanging over the head of Congress, the longer you drag this out, the better your chances get to defeat this huge land and water grab altogether.

You must keep up the pressure on your Congressman and both Senators.

The Wetlands, Corps and EPA Land Grab bill already passed the Senate Environment and Public Works Committee as S 787.

-----You can help immediately by calling both your Senators at (202) 224-3121 to ask for a copy of S 787. That will raise concerns and make them think twice about voting for S 787 if it comes to a vote in the full Senate.

-----You can also cause concern in your Congressman's office by calling to ask for a copy of the "America's Commitment To Clean Water Act". It does not have a bill number yet.

Call (202) 225-3121 to reach any Congressman. Ask for the staff person who handles the Corps of Engineers, Wetlands or EPA. He or she will know what bill you are talking about.

Ask for a copy of the new "America's Commitment To Clean Water Act." Your call will worry them and make them give careful thought before voting for the bill when Oberstar tries to sneak the bill through his Committee which he is planning to do.

Rest assured that American Land Rights will send you a vote summary after any Committee vote so you can see how your Congressman voted. The same is true of the full Senate if and when it takes up S 787.

No matter what the Committee staff says, Oberstar and his Committee plan to vote on the Wetlands, Corps, and EPA Land Grab ("America's Commitment To Clean Water Act") as soon as possible. You need to call, fax and e-mail your personal Congressman plus the key Congressmen on the Oberstar Committee listed below. They must continue to be overwhelmed with calls, faxes and e-mails.

-----Action Items:

-----1. Please forward this message to your entire e-mail list. The more people who hear about this giant land grab the better chance you have to defeat it.

-----2. Call your own Congressman at (202) 225-3121 to ask him or her to get a copy of the new "America's Commitment To Clean Water Act" from the Committee and send it to you. That will make his staff aware you are concerned and keeps them on their toes about the bill.

-----3. You should call, fax or e-mail the Congressmen on the Committee to ask for a copy of the new "America's Commitment To Clean Water Act." By just calling or sending your e-mail, you put them defensive. Call any Congressman at (202) 225-3121.

-----4. You can help quickly by calling both your Senators at (202) 224-3121 to ask for a copy of S 787. Ask for the staff person who handles Wetlands, the Corps or EPA. Tell them you are opposed to what you have heard is in the bill. That alerts them that you are concerned. That may keep them from supporting S 787 in a vote. Make the same request of your Congressman. The House bill has no number yet.

-----5. Fax or e-mail a one-page letter to your Congressman and both Senators opposing the Wetlands, Corps and EPA Land Grab bill in the House and Senate. Call it the "America's Commitment To Clean Water Act" but make it clear that Rep. Oberstar may have given it another name. Please use fax as mail is too slow. Just ask for the fax number when you call. The fax numbers for the Committee Members are listed below.

-----6. Call, fax and e-mail each Member of the House Transportation and Infrastructure Committee in opposition to the CWRA. An updated Transportation Committee list is below. They are likely to vote on the Wetlands, Corps and EPA Land Grab soon.

-----7. Call your friends and neighbors to get them to call your Congressman and both Senators. Tell them to ask for copies of the bill. S 787 in the Senate and any new Wetlands bill in the House that takes the word navigable out of the Clean Water Act. You must insist that the Corps and EPA water jurisdiction only apply to navigable waters. Oberstar wants to make the Corps and EPA jurisdiction apply to "all waters of the United states."

-----8. Go to www.landrights.org to read what the Oberstar Committee staff said in a White Paper about their goals for the Wetlands, Corps and EPA Land Grab Bill (Called the "Clean Water Restoration Act" in the Senate). You'll see in their own words their giant plan to take your land.

-----The Oberstar Transportation Committee bill would give the EPA and Corps jurisdiction over all waters of the United States and all activities affecting all waters of the United States. Your calls, faxes and e-mails now will really save you a lot of heartache later.

-----The Wetlands, Corps and EPA Land Grab Bill will give the EPA, Corps and the Greens a way to force regulation of virtually all private property and Federal lands. The bill does not have a number yet in the House. You must keep calling and putting pressure on your Senators and Representatives.

Background:

*****-----The Democrats are trying to seize control of all U.S. waters. The goal of the Corps and EPA Wetlands Land Grab is to give the Corps and EPA jurisdiction over, and control of, all watersheds and all activities affecting all waters of the United States

That means national land use controls. It will give the Corps of Engineers and EPA control over all of your property and water and any Federal land you use.

-----The Corps and EPA Wetlands Land Grab Bill is the biggest threat to private property since CARA and actually affects far more land and people. It seeks to overturn the Rapanos (2006) and SWANCC (2001) Supreme Court Decisions that said the Corps of Engineers and EPA could only regulate navigable waters. If the bill passes, the Corps and EPA will control all waters, all wetlands and all watersheds in the U.S.

Congress is considering in the Wetlands, Corp and EPA Land Grab Bill to expand the jurisdiction of the Clean Water Act Corps of Engineers and EPA to include all “activities affecting these waters.” It expands the definition of waters and gives the Environmental Protection Agency (EPA), Corps of Engineers and the Feds control over activities that affect all waters—any land use activities.

The Supreme Court said that when Congress passed the Clean Water Act in 1972 and limited the Corps and EPA jurisdiction to “navigable waters” they meant navigable waters.

But Oberstar is trying to get rid of the word “navigable” to give the Corps and EPA jurisdiction over ALL waters in the U.S. Right now the Corps and EPA are limited to jurisdiction over “navigable” waters.

The Corp and EPA Wetlands Land Grab Bill is a huge threat to private property owners and Federal land users. Using the name “clean water,” the Corp and EPA Wetlands Land Grab would give the Corps of Engineers, EPA and the Federal Government massive additional regulatory powers that supercede local and state government.

You must get your Congressman and both Senators to oppose this bill. You must tell them that you will hold them responsible in the next election if the “America’s Commitment To Clean Water Act” or a bill like it with another name, passes Congress. Please call, fax, e-mail and visit your Congressman.

Congressman James Oberstar, Chairman of the House Transportation and Infrastructure Committee has said he is going to change the name of his proposed “America’s Commitment To Clean Water Act” (CWRA) to some other name in an effort to confuse you. This is a common tactic.

They are getting so much opposition from you and others that they have changed the name to confuse the voters (you). You can call the bill “America’s Commitment To Clean Water Act” or “Clean Water Restoration Act” or the Corp and EPA Wetlands Land Grab.

-----Let there be no mistake. The House Transportation and Infrastructure Committee is going to vote on the Corps and EPA Wetlands Land Grab Bill shortly. You need to call, fax and e-mail your personal Congressman plus the Congressmen on this Committee with your opposition to the bill. You can call any Congressman at (202) 225-3121.

-----See the Committee List with phone, fax and e-mails for staff below.

The bill has already passed the Senate Environment and Public Works Committee as S 787. By looking at that bill, you can get an idea of how dangerous the House Bill will be. You must also keep the pressure on the US Senate. Don't forget to ask both your Senators for a copy of S 787, what they call the "Clean Water Restoration Act in the Senate, now called "America's Commitment To Clean Water Act" in the House.

-----Below we will review background of the key issue points and give you the list of the Members of the Transportation and Infrastructure Committee that must be deluged with call, faxes and e-mails.

Please don't sit back and say "I'll let someone else do it." If you do your part, you will defeat this bill. If you fail to do your part, you could lose. And the loss would be staggering.

The green groups and some Members of Congress are pushing as hard as they can to have the Wetlands, Corps and EPA Land Grab bill take control of your water and land. The bill does not have a new bill number yet in the House yet.

-----The Democrats are moving to seize control of all U.S. waters. The real goal of the Wetlands, Corps and EPA Land Grab bill is to give the Corps and EPA control of all watersheds and all activities affecting all waters of the United States. That means national land use controls. It will give the Corps of Engineers and EPA control over all your property and water and any Federal land you use.

-----Nobody wants to see the Corps or EPA in their backyard. The Wetlands, Corps and EPA Land Grab Bill is the biggest threat to private property since CARA and actually affects far more land and people. It seeks to overturn the Rapanos (2006) and SWANCC (2001) Supreme Court Decisions that said the Corps of Engineers and EPA could only regulate navigable waters. If the bill passes, the Corps and EPA will control all waters, all wetlands and all watersheds in the U.S.

-----Congress is considering in the Wetlands, Corps and EPA Land Grab Bill to expand the jurisdiction of the Clean Water Act, Corps of Engineers and EPA to include all "activities affecting these waters." In other words, the bill is a double whammy: It expands the definition of waters and gives the Environmental Protection Agency (EPA), Corps of Engineers (Corps) and other Federal agencies control over activities that affect all waters—any land use activities.

-----An example is that the Corps, EPA and Wetlands Land Grab will give Federal bureaucracies control over all the watersheds in the United States. That includes dry land inside or adjacent to watersheds

with water underground. That means everything. Because all land is in a watershed.

-----The Supreme Court said that when Congress passed the Clean Water Act in 1972 and limited Corps and EPA jurisdiction to “navigable waters” they meant navigable waters. But Rep. Oberstar is trying to either get rid of the word “navigable” or gut it to give the Corps and EPA jurisdiction over ALL waters in the U.S. Right now the Corps and EPA are limited to jurisdiction over “navigable” waters.

Rep. Oberstar is gutting the meaning of the word “Navigable” to allow Democrats on his Committee to vote for the Bill without getting hammered by you. Your Congressman must hear from you that you are not falling for this trick. Penalize your Congressman for any vote for the Corps/EPA Land Grab Bill.

The House Transportation and Infrastructure Committee could bring the Corps, EPA, and Wetlands Bill to a vote anytime in the next month or two. So this must be an all out push by you and your neighbors.

The Wetlands, Corps and EPA Land Grab Bill is a huge threat to all private property in America. It also threatens the use of Federal land. Under the name “clean water” the Corps, EPA and Wetlands Land Grab Bill would give the Corps of Engineers, EPA and the Federal Government massive additional regulatory powers that supercede local and state government.

You must get your Congressman and both Senators to oppose this bill. Don’t assume someone else will do it. You must take the responsibility to call, fax, e-mail and visit your Congressman.

-----The Wetlands, Corp and EPA Land Grab Bill is the biggest land grab in 30 years. Don’t wait. Take action now.

When you call, ask for the staff person who handles Wetlands, the Corps of Engineers (Corps) or Environmental Protection Agency (EPA).

Make it clear that a vote for the “America’s Commitment To Clean Water Act” will be held against the Congressman as well as both your Senators in the next election.

Make it clear that jurisdiction for the Corps and EPA must be limited to Navigable waters and not changed to “all waters of the United States.”

Don’t make it like a threat. Just make it clear that you and your neighbors will remember this vote for a long time.

Sincerely,

April -- 2010

Chuck Cushman

P.S. The Corps and EPA Wetlands Land Grab Bill is really a massive Federal land, water, wetlands and watershed power grab. It must be stopped. It will use “wetlands, clean water, the Corps of Engineers and EPA” to take control over every farm, ranch, and piece of private property with any water on it even if you only engage in “activities that might affect water.” It will give the Corps of Engineers and EPA control over your land. You’ll get tied up in a nightmare of red tape and bureaucracy.

-----House Transportation and Infrastructure Committee

Below is the fax and e-mail list of most of the Members of the Committee. You need to send your e-mail care of one of their staff that we have listed. You may call any Congressman at (202) 225-3121.

Chairman: James Oberstar (D-MN) (Democrats)
Ranking Minority Member: John Mica (R-FL) (Republicans)
House Committee on Transportation and Infrastructure

Minority (Republican) Direct Line: (202) 225-9446

Chief of Minority Staff – James Coon, (202) 225-9446 -
jim.coon@mail.house.gov--or ryan.boyce@mail.house.gov

Minority (Republicans) Fax: (202) 226-5435

Here's the list of committee members that will be voting on the bill

(listed in order of rank). Contact your member of Congress, even if he or she is not on the committee. You can call any House member at (202) 225-3121.
